SCI-001

STARTUP CAPITAL MEMORANDUM

Institutional Enhanced Edition | Version 2.0

DOCUMENT PURPOSE

This memorandum has been prepared for discussion purposes with prospective investors, strategic partners, advisors, and authorized review parties. It explains the startup capital opportunity associated with advancing STACK from implementation stage toward launch readiness.

Prepared By:
STACK Infrastructure Holdings LLC
Founder & Managing Member
Shane Clark
June 2026

Table of Contents

1. Executive Summary
2. Executive Project Snapshot
3. Project De-Risking Roadmap
4. Founder Background & Project Origin
5. Startup Capital Purpose & Use of Proceeds
6. Current Project Status & Development Milestones
7. Strategic Position & Project Advantages
8. Implementation Roadmap & Next Milestones
9. Governance, Operational Oversight & Execution Discipline
10. Investment Rationale & Capital Opportunity
11. Closing Summary & Investor Discussion
12. Appendices

Document Control

Item	Details
Document Title	Startup Capital Memorandum
Document Number	SCI-001
Version	2.0 - Institutional Enhanced Edition
Document Owner	STACK Infrastructure Holdings LLC
Prepared By	Shane Clark, Founder & Managing Member
Effective Date	June 2026
Classification	Confidential
Distribution	Authorized Review Parties Only
Record Retention	Permanent Corporate Record
Document Purpose	Provide prospective startup capital investors and strategic partners with an institutional overview of the STACK project, development progress, capital objectives, and implementation roadmap.

Section 1: Executive Summary

Purpose

This memorandum provides prospective investors, strategic partners, and authorized review parties with a concise institutional overview of STACK Infrastructure Holdings LLC, the development progress achieved to date, the startup capital objective, and the implementation pathway supporting continued advancement toward launch readiness.

Overview

STACK Infrastructure Holdings LLC is advancing a rules-based semiconductor infrastructure investment strategy focused on businesses supporting semiconductor production, deployment, testing, inspection, packaging, metrology, process control, and manufacturing enablement activities. The project has progressed beyond initial concept development and now resides in an implementation-focused stage.

EXECUTIVE THESIS

The Company is not seeking capital to determine whether the concept can be developed. The concept, methodology, portfolio framework, governance foundation, and strategic documentation have already been established. Startup capital is intended to accelerate execution and launch preparation.

The Opportunity

Semiconductor demand continues to be supported by artificial intelligence, data center expansion, cloud computing, advanced networking, industrial automation, automotive technology, and advanced computing. These trends create growing requirements for semiconductor infrastructure, including equipment, packaging, testing, inspection, metrology, process control, and manufacturing support.

Why STACK Exists

STACK was not developed to replicate existing semiconductor ETFs. It was developed to focus specifically on the infrastructure layer that enables semiconductor production. This includes the businesses that support the physical production, testing, inspection, packaging, and manufacturing enablement functions required for semiconductor capacity expansion.

Current Status

Development Area	Status
Research & Validation	Complete
Methodology Development	Complete
Portfolio Construction Framework	Complete
Historical Analysis	Complete
Governance Framework	Complete
Corporate Formation	Complete
Industry Engagement	Active
Implementation & Launch Preparation	Current Focus

KEY TAKEAWAYS

- The project has advanced beyond concept validation.
- The methodology, portfolio framework, and governance foundation have been established.
- Startup capital is intended to accelerate execution and implementation.
- The remaining challenge is disciplined execution and launch readiness.

Section 2: Executive Project Snapshot

This section provides a dashboard-level overview of the project for investors who need to understand the current position quickly before reviewing the full memorandum.

Category	Current Position
Organization	STACK Infrastructure Holdings LLC
Document	SCI-001 Startup Capital Memorandum
Project Stage	Implementation-Focused Development
Corporate Entity	Established
Methodology	Completed
Portfolio Construction	Completed
Governance Framework	Completed
Intellectual Property Framework	Established
Industry Engagement	Active
Current Focus	Execution & Launch Preparation

Completed vs. Remaining Work

Completed	In Progress	Upcoming
Research & Validation	Index Development	Launch Preparation
Investment Thesis	Strategic Capital Formation	Operational Finalization
Rules-Based Methodology	Operational Readiness	ETF Launch Readiness
Portfolio Framework	Industry Relationship Expansion	Long-Term Platform Expansion
Governance & Corporate Formation	Service Provider Coordination	

Traditional Startup vs. STACK

Traditional Startup	STACK Current Position
Raising capital to test an idea	Raising capital to accelerate execution
Concept still evolving	Framework established
Product still being developed	Methodology and portfolio framework completed
Organizational structure pending	Corporate entity and governance structure established
High concept risk	Primarily execution and implementation risk
Undefined roadmap	Defined implementation pathway

KEY TAKEAWAYS

- The opening investor message is execution, not experimentation.
- The project has already completed substantial foundational work.
- Capital is intended to reduce friction between the current stage and launch readiness.

Section 3: Project De-Risking Roadmap

The project has followed a structured development process intended to reduce uncertainty before seeking startup capital. Each milestone completed to date has addressed a distinct category of risk.

Milestone	Status	Primary Risk Reduced
Initial Market Research	Complete	Opportunity identification risk
Semiconductor Infrastructure Thesis	Complete	Concept uncertainty
Rules-Based Methodology	Complete	Strategy design risk
Portfolio Construction Framework	Complete	Portfolio implementation risk
Historical Analysis	Complete	Analytical support risk
Governance Framework	Complete	Organizational governance risk
Corporate Formation	Complete	Legal entity risk
Strategic Documentation	Complete	Operational preparation risk
Solactive Engagement	Active	Index development pathway risk
Tidal Engagement	Active	ETF launch pathway risk
General Services Agreement Review	In Progress	Contract execution risk
Index Guideline Finalization	In Progress	Operational readiness risk
Startup Capital Formation	Ongoing	Resource acceleration risk
Launch Preparation	Future	Final execution risk

Current Risk Profile

The remaining work is concentrated on implementation, commercialization, launch preparation, strategic relationships, and operational readiness. The project is no longer dependent on proving the initial concept or constructing the basic methodology from scratch.

INVESTOR INSIGHT

Startup capital supports the movement from established framework to implementation readiness. This distinction materially changes the nature of the investment discussion compared with many early-stage opportunities.

Section 4: Founder Background & Project Origin

The STACK project originated through observations made in industries directly supporting data center infrastructure expansion and semiconductor-related development activities. Those observations evolved into a structured research effort focused on identifying the companies supporting semiconductor production, manufacturing efficiency, testing, inspection, packaging, and related infrastructure functions.

Founder / Project Element	Description
Founder	Shane Clark
Role	Founder & Managing Member
Organization	STACK Infrastructure Holdings LLC
Professional Exposure	Data center infrastructure construction and mission-critical facilities
Project Origin	Observation of infrastructure demands supporting semiconductor and AI growth
Current Role	Advancing the project through implementation, strategic documentation, and capital formation

Development Journey

- Initial observation of semiconductor infrastructure demand
- Research into semiconductor manufacturers, designers, and supporting businesses
- Identification of an underrepresented infrastructure layer
- Development of a rules-based investment framework
- Corporate formation and governance development
- Industry engagement with service providers and ETF ecosystem participants

KEY TAKEAWAYS

- The project was developed from direct infrastructure exposure and structured research.
- The Founder has advanced the project from observation to institutional framework.
- The current stage is implementation-focused rather than exploratory.

Section 5: Startup Capital Purpose & Use of Proceeds

Startup capital is intended to support implementation-focused activities necessary to advance the project toward launch readiness. The purpose of the financing is not to validate the idea; it is to accelerate execution of a framework that has already undergone substantial development.

Use of Funds Framework

Use Category	Purpose
Professional Services	Legal support, contract review, advisory services, compliance-related support, and specialized consultation
Business Development	Strategic outreach, investor discussions, partnership development, networking, and relationship expansion
Travel & Strategic Meetings	Service provider meetings, investor meetings, industry events, and business development travel
Launch Preparation	Operational readiness activities, project coordination, implementation support, and strategic execution
Corporate Development	Administrative infrastructure, organizational development, technology resources, and business operations

What Startup Capital Does Not Fund

- Basic idea generation
- Proof-of-concept research
- Initial methodology creation
- Unstructured exploration
- Speculative initiatives unrelated to launch readiness

CAPITAL PHILOSOPHY

The objective is not rapid spending. The objective is efficient execution. Capital deployment should be conservative, strategic, and directly connected to launch readiness, implementation efficiency, and long-term value creation.

KEY TAKEAWAYS

- Startup capital supports execution-oriented activities.
- Capital deployment is tied to launch readiness and implementation efficiency.
- The Company does not anticipate deploying capital toward speculative initiatives unrelated to project advancement.

Section 6: Current Project Status & Development Milestones

The project has progressed through multiple stages of research, development, validation, documentation, and industry engagement. Current activities are focused primarily on execution and implementation.

Development Category	Milestones Completed
Corporate Development	Formation of STACK Infrastructure Holdings LLC; ownership structure; intellectual property framework; governance framework; corporate documentation
Strategy Development	Investment thesis; semiconductor infrastructure framework; methodology; portfolio construction; eligibility, purity, liquidity, tier, and position cap frameworks
Research & Validation	Semiconductor industry research; infrastructure mapping; public company analysis; comparative ETF analysis; historical analysis
Industry Engagement	Service provider discussions; Solactive engagement; methodology discussions; ETF development discussions; Tidal engagement; launch planning discussions

Current Priorities

- General Services Agreement review
- Index guideline review
- Launch planning activities
- Strategic capital formation
- Relationship development
- Operational preparation
- Service provider coordination
- Implementation planning

KEY TAKEAWAYS

- Foundational work is substantially complete.
- The project is currently in an implementation-focused phase.
- Remaining milestones are execution-oriented and tied to launch readiness.

Section 7: Strategic Position & Project Advantages

The project differs from many traditional startup opportunities because substantial development has already occurred prior to seeking startup capital. The remaining objectives are increasingly identifiable, actionable, and focused on implementation rather than concept validation.

Strategic Advantage	Investor Relevance
Substantial Development Completed	Reduces concept-stage uncertainty and demonstrates execution progress
Clear Implementation Pathway	Improves visibility into the remaining milestones
Industry Participant Engagement	Provides practical insight into implementation requirements and launch pathways
Founder Alignment	Creates accountability and long-term commitment
Implementation-Focused Capital Deployment	Capital is directed toward execution rather than experimentation
Preparation as Risk Reduction	Governance, documentation, and methodology reduce operational ambiguity
Long-Term Vision	Supports disciplined development beyond a single milestone

STRATEGIC POSITION

The primary challenge is no longer determining whether the project can be developed. The primary challenge is executing the remaining activities necessary to achieve launch readiness.

KEY TAKEAWAYS

- The project has already moved beyond the highest uncertainty phase.
- The opportunity profile is defined by execution readiness and implementation quality.
- Strategic capital may improve flexibility and accelerate advancement.

Section 8: Implementation Roadmap & Next Milestones

The development roadmap provides a structured view of how the project is expected to advance from its current implementation-focused stage toward launch readiness.

Phase	Status	Objective
Phase I - Concept Development	Complete	Identify the opportunity and define the initial thesis
Phase II - Strategy Development	Complete	Develop methodology, eligibility, purity, liquidity, tier, and position cap frameworks
Phase III - Validation & Documentation	Complete	Complete historical analysis, governance, ownership, strategic documentation, and corporate formation
Phase IV - Industry Engagement	Active	Advance Solactive discussions, Tidal discussions, service provider engagement, and launch planning
Phase V - Index Development & Operational Readiness	In Progress	Review GSA materials, index guideline requirements, implementation planning, and service provider coordination
Phase VI - Strategic Capital Formation	Active	Conduct investor discussions, strategic partner discussions, business development, and capital formation
Phase VII - Launch Preparation	Future	Operational finalization, launch planning, strategic communications, and administrative preparation
Phase VIII - Launch Readiness	Target Objective	Complete implementation activities and position the project for launch objectives

CURRENT POSITION

STACK currently occupies the transition zone between industry engagement, index development, strategic capital formation, and operational readiness.

KEY TAKEAWAYS

- The roadmap is sequential, not speculative.
- The majority of foundational work is complete.
- Startup capital may reduce friction across the remaining implementation phases.

Section 9: Governance, Operational Oversight & Execution Discipline

The governance framework supporting STACK is intended to promote accountability, consistency, and disciplined decision-making throughout implementation and future operations. Defined processes and documentation reduce ambiguity and reinforce long-term stewardship.

Governance Component	Status
Governance Framework	Established
Decision-Making Structure	Defined
Documentation Standards	Implemented
Operational Policies	Active
Execution Oversight	Ongoing
Intellectual Property Framework	Established

Core Governance Principles

- Maintain disciplined adherence to documented methodology
- Support transparent operational processes
- Protect intellectual property and organizational continuity
- Promote consistency in execution and oversight
- Align implementation decisions with long-term strategic objectives

KEY TAKEAWAYS

- Governance is treated as a strategic asset.
- Operational discipline supports investor confidence.
- The governance framework strengthens the project as it advances toward launch readiness.

Section 10: Investment Rationale & Capital Opportunity

The investment opportunity presented by STACK is based on an implementation-stage project that has already completed substantial foundational work. Startup capital is intended to accelerate commercialization, strategic engagement, and operational execution.

Investment Attribute	Current Position
Project Stage	Implementation-Focused
Methodology	Completed
Portfolio Framework	Established
Governance	Implemented
Primary Use of Capital	Execution & Launch Preparation
Remaining Risk	Operational Execution
Investor Alignment	Long-term strategic participation

Why Capital Is Being Raised

- Accelerate launch preparation
- Strengthen strategic relationships
- Support professional services and contract review
- Expand operational readiness
- Enable disciplined commercialization
- Improve implementation efficiency

INVESTOR FRAMING

Because substantial development has already occurred, the investment discussion shifts from concept risk to execution quality. This creates a different capital profile than many traditional early-stage ventures.

KEY TAKEAWAYS

- Capital is being sought because the project is ready for implementation acceleration.
- The Company values strategic alignment and long-term partnership.
- The remaining challenge is execution, not creation.

Section 11: Closing Summary & Investor Discussion

STACK Infrastructure Holdings LLC was established to develop and advance a semiconductor infrastructure investment strategy focused on businesses supporting semiconductor production, deployment, testing, inspection, packaging, metrology, process control, and manufacturing enablement activities.

Final Investment Discussion

The Company is not seeking support for an idea. The Company is seeking support for the execution of a project that has already undergone substantial development. The methodology exists. The framework exists. The portfolio framework exists. The governance structure exists. The implementation pathway exists. The remaining challenge is execution.

Current Position	Summary
Foundational Development	Substantially complete
Implementation Stage	Active
Strategic Capital Formation	Current priority
Operational Readiness	Advancing
Launch Preparation	Future development phase
Long-Term Objective	Advance from implementation stage to launch readiness

Discussion Invitation

The Company welcomes discussions with prospective investors, strategic partners, industry participants, advisors, and authorized review parties interested in learning more about the project, capital formation objectives, strategic relationships, future milestones, and long-term vision.

KEY TAKEAWAYS

- The project has progressed from idea to implementation-stage initiative.
- Startup capital may serve as a catalyst for continued advancement.
- The objective remains disciplined execution toward launch readiness.

Investment Tiers

The following tiers are illustrative only. Final economics, rights, benefits, information access, and ownership terms may evolve based on investor relationship, strategic value, investment size, applicable law, and executed legal documentation.

Tier	Indicative Investment	Illustrative Alignment Benefits
Strategic Supporter	\$25,000 - \$49,999	Periodic investor updates; annual strategy briefing; founding investor recognition.
Growth Partner	\$50,000 - \$99,999	Enhanced reporting; priority communications; investor Q&A opportunities.
Strategic Investor	\$100,000 - \$249,999	Direct management discussions; early strategic updates; select planning briefings.
Executive Partner	\$250,000 - \$499,999	Customized reporting; expanded management access; strategic relationship opportunities.
Anchor Investor	\$500,000+	Terms negotiated individually based on investment size, strategic value, and long-term alignment.

Equity & Ownership

Ownership interests, membership units, convertible instruments, or other economic rights associated with an investment will be determined through separate legal documentation and negotiated based on the Company's valuation, capital structure, and agreed terms.

The Company intends to preserve founder alignment while structuring investments that create long-term value for all stakeholders. Final rights, restrictions, governance provisions, ownership terms, and investor protections will be governed only by executed legal agreements.

Nothing contained within this memorandum constitutes an offer of securities or guarantees any specific ownership percentage, valuation, return, liquidity outcome, or investment result.

Long-Term Vision

STACK Infrastructure Holdings LLC seeks to become a premier developer of institutional-quality semiconductor infrastructure investment products. The strategy extends beyond a single ETF toward a scalable platform for additional proprietary indexes, financial products, and intellectual property over time.

Cross-Reference Map

Document	Primary Purpose
Starter Investment Memorandum	Why should I invest?
SIO-001	How does the strategy work? Methodology, construction, and due diligence detail.
SCI-001	Why does the business exist? Strategic vision and market rationale.
Governance Binder	Controls, oversight, policies, and institutional operating framework.
IP Binder	Ownership, assignments, protection, and intellectual property documentation.

Disclaimer

This memorandum is for informational and discussion purposes only and is not an offer to sell or a solicitation to purchase securities. Any investment would be made only under definitive legal documentation, due diligence, applicable law, and mutually agreed terms. No valuation, financing terms, launch timing, performance, return, or liquidity is guaranteed.

Section 12: Appendices

Appendix A - Corporate Profile

Item	Details
Company Name	STACK Infrastructure Holdings LLC
Entity Type	Arizona Limited Liability Company
Organization Structure	Member-Managed Limited Liability Company
Founder & Managing Member	Shane Clark
Primary Purpose	Develop, own, administer, and advance intellectual property, methodologies, strategic frameworks, and related initiatives associated with semiconductor infrastructure investment strategies.
Current Activities	Strategy development, index development activities, capital formation, industry engagement, business development, and launch preparation

Appendix B - Confidentiality Notice

This memorandum contains confidential and proprietary information belonging to STACK Infrastructure Holdings LLC. The information contained herein has been prepared solely for discussion purposes with prospective investors, strategic partners, advisors, and authorized review parties. Recipients should maintain the confidentiality of the information and should not reproduce, distribute, disclose, publish, or transmit any portion of this document without prior written consent from STACK Infrastructure Holdings LLC. Nothing contained herein shall be construed as granting ownership rights, licensing rights, or intellectual property rights of any kind. All rights are reserved.

Appendix C - Disclaimer

This memorandum is provided solely for informational and discussion purposes. Nothing contained herein constitutes an offer to sell securities, a solicitation to purchase securities, investment advice, legal advice, tax advice, or regulatory advice. Any future investment product, index, strategy, or related initiative remains subject to applicable regulatory requirements, contractual agreements, operational considerations, market conditions, and third-party approvals. Statements contained within this memorandum may include forward-looking statements and projections. Actual results may differ materially from expectations. Recipients are encouraged to conduct their own independent review and consult appropriate professional advisors prior to making any investment or business decision.

Appendix D - Project Status Snapshot

Category	Status
Project	STACK Semiconductor Infrastructure Strategy
Organization	STACK Infrastructure Holdings LLC
Project Stage	Implementation-Focused Development Phase
Current Status	Active
Capital Objective	Secure startup capital intended to support implementation activities, operational readiness, business development, industry engagement, and launch preparation efforts
Status Assessment	The project has progressed beyond concept validation and entered an implementation-focused phase. The primary objective is executing the remaining activities necessary to achieve launch readiness.
